

## Custom Cabinet Engineer/ CNC Programmer

Pleasant Valley Cabinets, a privately owned customer cabinet shop in Swan River, MB is searching for a motivated, detail – oriented individual to join our team as a custom cabinet engineer / CNC programmer.

The cabinet engineer is responsible for the successful design and development of custom cabinetry projects. The engineer utilizes design software, cabinet expertise, and effective communication skills to ensure projects are set up for success. In this role you will have the opportunity to be an integral part of the team that produces quality cabinets with a local flare, while working in a fun, team-oriented environment.

### **Key Duties and Responsibilities:**

- Engineer and design custom cabinets for blueprints and customer specifications using Cabinet Vision software to ensure proper cabinet fit and function.
- Review designs from the sales team and ensure cabinet design fit company fit company standards and manufacturing / installation limitations.
- Prepare shop drawings using Cabinet Vision
- Collaborate with sales and production team members to guarantee team has a clear understanding of the expectation.
- Create other drawings as required in order to ensure the production team has a clear understanding of the expectation.
- Create a material list for all products and materials needed and work with purchasing agent to guarantee all materials arrive in a timely manner for start production.
- Ensure building codes are adhered to, including disability requirements for commercial projects.
- Make certain that project scope and customer specifications are represented accurately in shop drawings.
- Other duties as assigned.

### **Join our team and you could enjoy:**

- A rural living lifestyle
- Competitive pay with room for growth.
- Optional Disability and life insurance coverage
- Optional RRSP plan with employer contributions
- Safety Bonus incentive
- One Fishing Friday per month incentive

### **Education and Experience:**

- At least 3 years of cabinet industry experience
- Experience using Cabinet Vision or other computer aided design software is required.
- Must understand the layout, design, and fabrication of residential and commercial cabinetry.
- Strong understanding of cabinet manufacturing for best practices is essential. Knowledge and experience in cabinet installation is strongly recommended.
  - Must be fluent in the English language.
