Generating bright futures

**Closing Date:** 2022/12/05

## PROJECT ENGINEER

### Riel Converter Station, Navin, MB

*Manitoba Hydro is consistently recognized as one of Manitoba's Top Employers!*

#### Great Benefits

- Competitive salary and benefits package.
- Defined-benefit pension plan.
- 4-day work cycle which normally results in every Monday off, providing for a balanced approach to work, family life and community.
- Flex-time and partially remote work schedule (providing the option to work remotely one day per week), depending on nature of work, operational requirements and work location.

Manitoba Hydro is a leader among energy companies in North America, recognized for providing highly reliable service and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company that supports innovation, commitment and customer service.

We are seeking an experienced and highly motivated Project Engineer to join our team to perform contract and construction management activities for all Manitoba Hydro facilities including distribution, transmission, generation and HVDC stations.

#### Responsibilities:

- Will provide activities related to the project planning, coordination and contract administration of complex construction projects from the tendering stage to overall close out and the development of processes for project monitoring. Projects to be medium to large size Construction (C), Procurement & Construction (PC) or Engineering, Procurement & Construction (EPC).
- Lead development of overall project Engineering, and/or procurement, and/or construction plans including resource requirements, estimating, procurement strategies and risk assessment.
- Lead cross-functional teams, including external workforce, as required to support construction, construction management, specification preparation scheduling, estimating, material procurement, project controls and contract administration activities.
- Lead and coordinate complex multidisciplinary projects, guide, and oversee multiple project teams.
- Lead the preparation of RFP & RFS contracts for Engineering and construction, acting as technical contact for clarifications, and preparation of addendums as required.
- Lead coordination with internal Supply Chain Management and Law Departments to prepare, tender, negotiate, contract award, and lead the administration of contracts.
- Makes decisions specific to cost vs. environmental, safety and community engagement impacts and makes recommendations on issues of greater scope.
- Evaluate, provide feedback, and select and negotiate with contractors, consultants, and suppliers.
- Collaborates with contractors, consultants, and suppliers in service/product delivery, providing specialized technical advice.
- Lead, assist or direct & review analysis and review of contract claims, preparation, and approval of change orders.
- Conducts complex technical interaction with contractors, consultants, and suppliers with respect to Engineering, procurement, construction, environment, community engagement and safety, including service/market evaluation and development.
- Assist in the development and implementation of processes for contract monitoring.
- Ensure compliance with government and Manitoba Hydro regulations including workplace safety and environmental rules and regulations.
- Keep abreast of latest developments in areas such as construction methods and environmental and safety management as they relate to construction.

#### Qualifications:

- Graduate in Engineering from a University of recognized standing, with seven years of related experience, including two years in project management and administration.
- Capable of supervising, directing, motivating and mentoring personnel in an environment with frequent changing priorities and

requests for work.

- Demonstrated experience working on multi-disciplined engineering and construction projects.
- Critical Infrastructure Protection (CIP) Training is required and must be completed prior to transfer date and renewed annually.
- Membership in Engineers Geoscientists Manitoba (formerly APEGM) as a Professional Engineer.
- Demonstrated project management experience associated with initiating and coordinating projects.
- Willing to work extended periods of time in remote locations in Manitoba.
- Demonstrated high degree of initiative and ability to interact effectively with others at all levels, both inside and outside the Corporation.
- Capable of applying engineering principles in dealing with involved and adverse technical problems.
- Good computer skills including experience with scheduling software, collaborative file sharing software, SharePoint and Microsoft Office suite software.
- May be required to assist with contract administration and construction management in a field office for periods of time anywhere in Manitoba.
- Possess a valid Province of Manitoba Driver's Licence.

### **Salary Range**

Starting salary will be commensurate with qualifications and experience. The range for the classification is \$47.09-\$64.51 Hourly, \$90,229.10-\$123,616.48 Annually.
